THE CORE OF ALL OUR LAMINATE
FLOORING IS MADE OUT OF
100% RECOVERED WOOD

SUSTAINABLE. NATURALLY.

We produce flooring as sustainable as possible, constantly innovating to minimize the potential impact on our planet. As the inventors of laminate flooring, we're proud to be the first producer to receive the Nordic Swan label and EU Ecolabel for a floor.

Our laminate floors are certified by PEFC – one of the most trusted certificates in sustainable sourcing. This guarantees our recovered wood is sourced from sustainably managed forests and controlled sources.

MAKING USE OF RECOVERED WOOD

Trees are also an important habitat for animals and essential in stimulating biodiversity. We therefore use 100% recovered wood when producing the high-density wood fibreboard in the core of our laminate. This is wood collected from sawmills, forest management processes.

CLEAN AIR INDOORS

We spend lots of time indoors, and there are many things that influence air quality, like ventilation, cleaning agents, candles and even your furnishing materials and flooring. We produce flooring in-house so we know exactly which materials are involved and can control emissions of harmful substances. And you can install your flooring without needing any adhesives.

MINIMAL VOC EMISSION

We work to minimize VOC (Volatile Organic Compounds) emissions. Formaldehyde is a VOC that's found in flooring. Formaldehyde emission in our laminate flooring is negligible and 5-10 times lower than EU restrictions, so there's no risk for you or your family.

RUNNING ON GREEN ENERGY.

Wood can be a source of green energy. UNILIN, the group behind Pergo, has invested in two biomass plants where wood waste is converted into energy. This enables us to run our production on 24% green/renewable electricity and 74% green heat at a group level in 2021.

EASY TO INSTALL, EASY TO LIVE WITH

We believe in making floors that will last and bring joy, instead of becoming waste after a few years. That's why we offer up to life-long warranty. Thanks to our advanced click technology you can install your floor glue-free without needing tools. That way you can uninstall your floor without any hassle or damage.

UNDERLAYS

CHOOSE THE UNDERLAY THAT'S RIGHT FOR YOU.

1. Decide where you want to install the underlay. Our underlays give you excellent sound insulation. Walking sound reduction shows you how much sound is reduced in the room. Impact sound reduction indicates how much sound is reduced to the rooms below.
2. Check your subfloor: is it wood or concrete?

COMBI-LAY STANDARD

Combi-Lay Standard is no normal underlay. The dense, closed cell polyolefin foam provides excellent support, with good reduction of both reflected and impact noise.
