CARING FOR YOUR BEAUTIFUL PARADISE LAMINATE FLOOR

Caring for your *Paradise Laminate* flooring is easy when you know how.

Recommended Initial Treatment

We recommend the use of Bona stone, tile and laminate floor care, because we know and trust these products.

YOUR PARADISE LAMINATE MAINTENANCE PROGRAM

The nature of the maintenance will depend on the amount and type of traffic, and also depends on the design. A typical maintenance program for a standard home would be as follows:

Never leave standing water more than 24 hours on the floor.

Daily Care

Sweep with a broom or vacuum the floor to remove any grit or dirt. Stubborn dirt can be removed by wiping the surface with a pH neutral cleaning product.

Monthly Care

Sweep with a broom or vacuum the floor. Mop the entire floor by using a pH neutral cleaning product. The minimum amount of water/liquid should be used to prevent standing water/moisture from penetrating into joins. Remove any marks using a damp cloth.

Removing Difficult Stains

For chocolate, grease, juice and wine stains, use lukewarm water and a non-abrasive cleaner. Nail polish, tar, markers, crayon, lipstick, ink and cigarette burns can be removed using nail polish remover or denatured alcohol. For candle wax and chewing gum, scrape carefully with a blunt plastic scraper.

Add Eucalyptus oil to a damp cloth and wipe scuff marks to remove any residue.

NOTE: Do NOT use a solvent or ammonia-based cleaner, either in liquid or powder form.

Do NOT use steam apparatus to clean your floor, as this may cause damage to the surface.

AVOID: Paints, bitumen, acids, chemicals, dyes and shoe polish. These can discolour your floor. Don't leave spills on your floor for extended periods of time. Remove stains quickly with a damp cloth.

Entrance Mats

A proper clean-off zone is strongly recommended. It will reduce the soiling of the flooring by as much as 70%. Entrance mats, when properly serviced, can effectively remove any abrasive and foreign materials from foot traffic and cut down on tracked in water. Where possible, prevent dirt from reaching the floor. A suitable barrier matting system will help prevent soiling and abrasive material from entering a building and make maintenance easier. Regularly clean the clean-off zone so that it functions optimally. Prevent fibres from the clean-off mat from running or adhering together with dirt. As far as possible, remove sand and adherent dirt such as chewing gum using a spray or gum remover. Replace the clean-off mat in time to ensure an optimally functioning dirt entrapment zone. Avoid rubber or latex backed mats as these may leave stains.

Protection of Sliding Furniture

Good protective caps that have a sufficiently large support surface, possibly a hinge to ensure a straight contact between the furniture item and the flooring, and are made of a non-absorbent material to prevent the ingress of moisture and dirt.
